IN THE AGE OF DISTRACTION, FOCUS IS THE NEW SUPERPOWER.

Most corporate teams do not suffer from a lack of talent, but from a fragmentation of attention.

The "THE STRATEGIC MENTALIST" talk is not just another motivational speech. It is the installation of a mental operating system based on the 100-day protocol created by Luca Volpe. A unique blend where theoretical concepts are instantaneously demonstrated through world-class mentalism.

THE THREE PILLARS OF THE TALK

The Mental Contract (Decision)

Transform goals
into non-negotiable commitments

The State Anchor (Physiology)

How to access peak
performance on demand
(State of Flow)

The MIT Method (Execution)

Identify and protect
the highest impact action
for extraordinary results
